The image displays an electrical schematic diagram and a software interface. The schematic shows three 400V AC lines (Z01-40, Z02-40, Z03-40) connected to a 2.25A circuit breaker (Q600). The power is then distributed to a V60D terminal block and a LENSE VECTOR 8400 inverter. The inverter is connected to a motor (M100) through a contactor (C100). The software interface shows a detailed equipment list with columns for description, equipment, characteristics, and various parameters.
